Phonak Marvel 2.0

More love at first sound
More to Marvel

Since its introduction, Phonak Marvel has been living up to its reputation of being, not just a great hearing aid, but a multifunctional marvel delivering a love at first sound experience – each and every day. With Marvel, hearing aid wearers enjoy all the benefits of cutting-edge Phonak technologies:

- Clear, rich sound
- Connects to smartphones, TV and more
- Rechargeable
- Smart apps

All of these key characteristics is what sets Marvel in a league of its own and now, it is about to get even more marvelous. Introducing Marvel 2.0:

- More hearing performance
- More connectivity and apps
- More choice

All of these improvements are now available for previous and new generations of Marvel hearing aids, creating an industry-first standard to benefit an entire platform.
More hearing performance

From the moment you first fit your clients with their Marvel hearing aids, they can expect:

- Exceptional sound quality from the first fit\(^1\)
- Better speech understanding in noise\(^2\)
- Reduced listening effort in noise\(^3\)
- Top rated streamed sound quality\(^4\)

Now we're ready to take the proven Marvel performance to the next level.

Easy access to even more hearing performance with RogerDirect\(^\text{TM}\)

Roger\(^\text{TM}\) technology provides outstanding hearing performance in noise and over distance.\(^5\)

As a break-through in hearing technology, Marvel hearing aids now feature RogerDirect. This allows Roger to stream directly to Marvel hearing aids without attaching an external receiver. The result:

- Up to 42% smaller\(^*\)
- On average 27% less battery consumption\(^*\)
- All RIC and BTE models are Roger compatible

With this major innovation, we've brought the best of both worlds together and created an unbeatable combination.

---

\(^*\) With RogerDirect compared to previous generation
More connectivity and apps

More Bluetooth® connectivity

Unlike any other hearing technology, Marvel can connect directly to either iOS®, Android™ or other Bluetooth® enabled devices.

With Marvel 2.0, Phonak offers more connectivity and improved usability, allowing your client to easily pair their hearing aids to 2 Bluetooth devices instead of just one.

More personalized hearing experience

From scientific research we know that some clients want to have the ability to fine-tune their hearing aids. This involvement increases clients' perceived sound quality and hearing aid satisfaction.

The new advanced Remote Control function within the myPhonak app allows your clients to adjust their hearing aids to their individual needs in real time. They can easily select standard pre-settings and create personalized programs, giving them more control for their hearing preference.
Marvel 2.0 features new products designed to meet the expectations of hearing aid wearers and to enable you to offer even more marvelous solutions to your clients. The extended Marvel portfolio is made up of a new Receiver-In-Canal (RIC), two Behind-The-Ear (BTE), and three pediatric hearing aid models, as well as two new accessories.

**Phonak Audéo™ M-RT**
